LINE CARD

QUALITY CONTROL

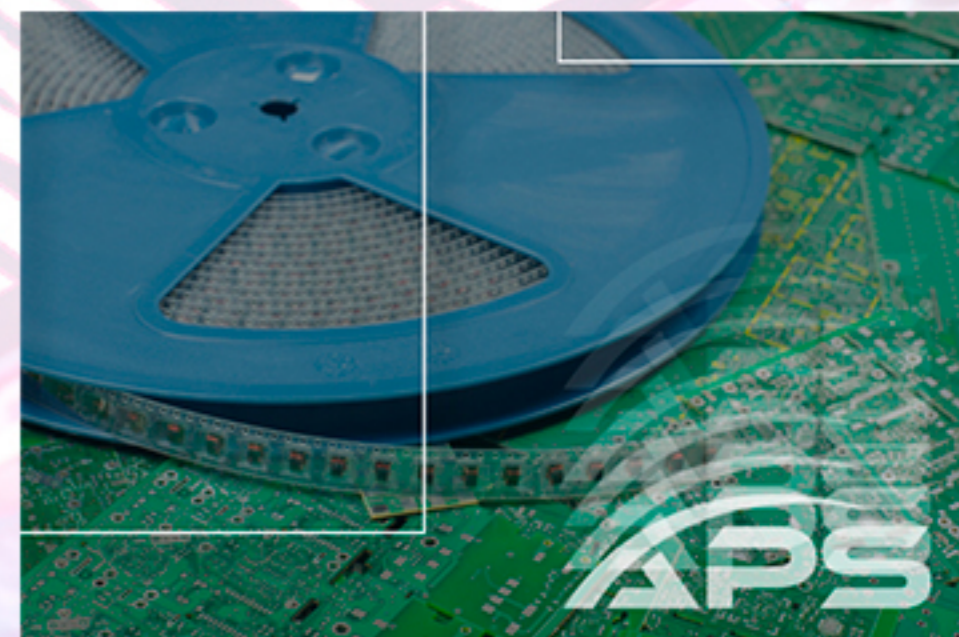

ACCESS TO FRANCHISE SOURCES

We provide access to more than 30 million SKUs from more than 4,000 manufacturers.

SHORTAGES

- 1.- Discrete hard to find components sourcing through legitimate, experienced global partners.
- 2.- OEM and CM excess stock availability

SERVICES

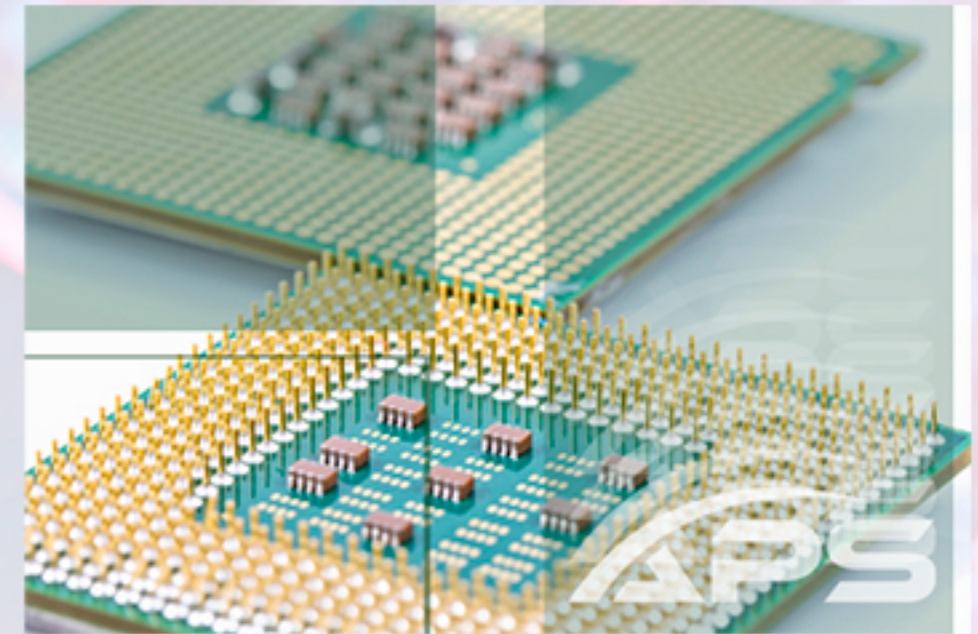

INDUSTRIES

LINE CARD

QUALITY CONTROL

OBSOLETE COMPONENTS AND PARTS EXPERT LOCATOR

APS has developed a state-of-art BOM and Obsolete part search database granting our customers direct access to electronic component databases from more than 150 countries. Our comprehensive parts list contains over 1 billion industrial, commercial and military components. You can send your urgent RFQ's to sales@authorizedprocurementsolutions to receive a quotation within 24 hours.

AUTOMATION PRODUCTS AND SERVICES

APS has provided essential industrial controls and automation using direct overseas channels to serve the automation market. Our unique strategy allows us to deliver quality products for less than local franchised companies.

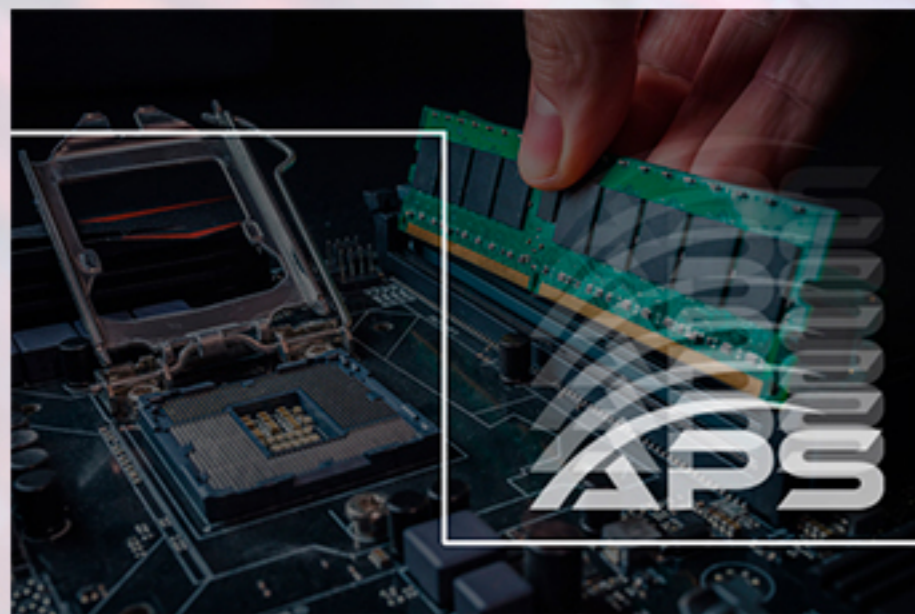

SERVICES

FREE BOM EVALUATION FOR COST SAVINGS

Our unique process has helped thousands of OEMs obtain effortless cost advantage from more than 500+ franchise distributors and component manufacturers located in crucial locations abroad.

MANUFACTURING OUTSOURCING

PCB'S, PCBA Assembly, CNC
Machining, Customize Plastics

FULL SPECTRUM PROCUREMENT SOLUTIONS

Our supply solutions "experts" team has developed a customized state-of-art tool to rapidly and effectively locate and identify a broad array of products from any region around the globe.

APS, LLC., is committed to comply with applicable requirements and continually improve the effectiveness of our Quality Management System to provide quality parts and services that exceeds our customer expectations.

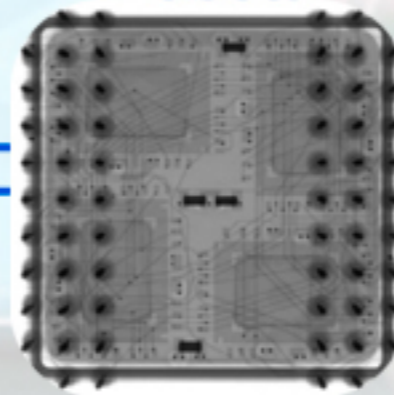

1. External Visual Inspection

Examination reveals evidence of prior use, secondary coating, socket pulls, re-tinning, lead reforming, remarking, fraudulent/counterfeit parts.

2. Dimension Verification

The Measuring testing confirms the manufacturer's specifications.

3. X-Ray Analysis

Die size, general shape, lead frame construction, wire bonding gauge and routing can be checked.

4. Pin Correlation Testing

To detect gross defects such as opens, shorts, excessive leakage, and ESD damage caused by improper handling or storage.

5. Functionality Test

Ensures proper device operation - acceptable power consumption, basic functionality, and verifies datasheet parameters.

6. Solderability Test

Reveals evidence of porosity, voids, coverage and inconsistent wetting.
